Director of Q.E. & Operations
Microplastics Inc.
Sent via e-mail to dnelson@microplastics.com

Dear Dan,

This letter is in response to your Vydyne.com information request, concerning REACH. Solutia is well aware of the REACH legislation and has an active team in place to ensure proper compliance.

Vydyne resins are classified under REACH as Preparations. As such, the monomers for the main polymer, as well as every additive which is sent into the EU in greater than 1000 kg/year per importing company must be registered. Solutia intend to Preregister and to Register the monomers of Nylon 6,6, as well as 15-20 additives.

Parts which are molded from Vydyne, or from any other resin, are considered Articles, and are usually exempt from the requirements of REACH. If a molder is in the EU, the molder must ensure that its resin supply is properly registered. If the molder is outside the EU, the molder has no REACH obligations; unless the molded part is designed to intentionally release a chemical (examples are inkjet cartridges, ball point pens, or candles).

If the parts which are sent to your UK distributor are not intended to release chemicals during their intended use, they are exempt from REACH.

If you have any additional questions, the Solutia REACH contacts are:

Solutia Primary REACH Contact
Dr. Andre Aarts
Product Stewardship Lead, Primary REACH Coordinator
Solutia Europe S.A./N.V.
Parc Scientifique Fleming
Rue Laid Burniat 3
